Career Objective

Motivated and detail-oriented aspiring Full Stack Developer with a strong foundation in front-end development, UI/UX principles, and problem-solving. Eager to contribute to building user-centric, scalable web applications, collaborate effectively with teams, and continuously enhance technical skills through real-world challenges and hands-on learning.

Education

B.E. Mechanical Engineering – Kumaraguru College of Technology — CGPA: 7.85

HSC – Sri Saraswathi Vidyalaya Matriculation Hr. Sec. School — 71%

SSLC – Bharat Matriculation Higher Secondary School — 76%

Technical Skills

- Frontend: HTML5, CSS3, JavaScript, Responsive Design
- Currently Learning: React.js, Java, Spring Boot, MySQL, RESTful APIs

Professional Experience

United Lex (iRunway Pvt Ltd) – Bangalore, India

Associate Analyst – Cybersecurity & Data Operations (June 2023 – Aug 2024)

- Reviewed and analyzed digital documentation to ensure compliance with data privacy and security standards.
- Collaborated with cross-functional teams to uphold confidentiality and data accuracy.
- Gained hands-on experience with secure data management tools relevant to backend operations.
- Strengthened skills in client communication, meeting deadlines, and delivering high-quality output in Agile environments.

Projects

- Portfolio Website – Personal responsive portfolio with sections for about, projects, resume, and contact.
- Restaurant Landing Page – HTML/CSS/JS responsive single-page restaurant homepage with menu and animations.
- Login/Signup Page – Form validation and UI/UX-focused responsive login/signup system.
- Responsive eCommerce Homepage – Realistic product section, category layout using Flexbox/Grid, and mobile-friendly design.
- Product Listing App (React.js) – Built using React functional components; displays product cards dynamically using props and state.
- Task Manager App (React.js) – Feature-rich to-do/task tracker with add/delete functionality, component reusability, and responsive design.

Certifications

Java Full Stack Development Certification (Ongoing) – Besant Technologies | 2025 – Present

- Developing full-stack web applications integrating front-end and back-end technologies
- Gaining hands-on experience with Java, Spring Boot, MySQL, RESTful APIs
- Building real-time projects that demonstrate practical application of skills

Strengths

- Quick learner with a passion for clean, responsive design and seamless user experiences
- Strong team player with effective communication and problem-solving abilities
- Detail-oriented with a commitment to writing high-quality, maintainable code
